Received 8 April 2018, Accepted 23 April 2018

The results of floristic studies of springs located on the territory of Western Kazakhstan are presented. The list of rare and protected species of flora of spring complexes listed in the Red Book of Russia and Kazakhstan is given. The geographical coordinates of the location of the detected plant species are indicated.

Key words: rare and protected plant species, springs, flora, geographical coordinates, the Red book of Kazakhstan, the Red book of Russia, Western Kazakhstan.
